

FORS & SMAS Certifications

## Allpack Packaging Ltd Secures SMAS Worksafe and FORS Bronze Accreditations

Allpack Packaging Limited proudly announces the attainment of two significant industry accreditations: SMAS Worksafe and FORS Bronze. These certifications underscore our unwavering dedication to maintaining the highest standards in health and safety, as well as operational efficiency in transportation.

The SMAS Worksafe accreditation, awarded by Safety Management Advisory Services (SMAS), is a nationally recognised health and safety certification scheme and a registered member of the Safety Schemes in Procurement (SSIP). This accreditation affirms Allpack's compliance with rigorous health and safety standards, ensuring a safe working environment for employees, clients, and stakeholders.

In addition, and thanks to our committed team we have achieved the Fleet Operator Recognition Scheme (FORS) Bronze accreditation. FORS is a voluntary accreditation scheme that promotes best practices for commercial vehicle operators in safety, efficiency, and environmental protection. The Bronze level indicates that Allpack's fleet operations meet the required standards in driver and vehicle safety, fuel efficiency, and environmental impact.

"Securing both SMAS Worksafe and FORS Bronze accreditations reflects our comprehensive approach to operational excellence," said George Clarke, Managing Director at Allpack Packaging Limited. "These achievements demonstrate our commitment to not only delivering high-quality packaging solutions but also ensuring the safety of our operations and the well-being of our team and the environment."

These recent accreditations complement Allpack's existing certifications, including ISO 9001 Quality Management, ISO 14001 Environmental Management, BRCGS AA\* grade for Storage and Distribution, and SafeSupplier verification. Collectively, these recognitions highlight Allpack's dedication to quality, ethical practices, and continuous improvement.

Allpack continues to lead in delivering innovative, sustainable packaging solutions while prioritising health and safety, environmental responsibility, and operational excellence. Well done to all involved who have worked hard to attain and maintain these industry recognised accreditations, that our customers consistently use to help differentiate against our competitors and provide Allpack with a unique selling point in a competitive sector.

# Allpack Exhibits at Three Leading Exhibitions During Q2

IRX Expo, 13-14 May, NEC

## IRX Expo, 13-14 May, NEC

Allpack's Stand A10 at this year's IRX Expo, 13-14 May, NEC, showcased our innovative packaging solutions tailored specifically for the e-commerce sector. From protective packaging materials to custom-designed box styles, Allpack offered a diverse array of packaging solutions to ensure products arrive safely at their destinations while also reflecting the unique identity of the brand owner.

The Allpack stand highlighted the advancements in our sustainable packaging options, including increasing amounts of recyclable and recycled materials, compostable packaging, and reducing packaging waste solutions. It was evident during the show that environmental packaging continues to gain further importance among consumers and businesses alike, which is why Allpack's commitment to sustainability underscores our continued dedication to ensuring responsible packaging practices.

DELIVER Exhibition, 4-5 June, RAI

## DELIVER Exhibition, 4-5 June, RAI Exhibition Centre

Allpack is delighted to report a highly successful participation at the 10th Anniversary of the DELIVER Europe Exhibition, held 4-5 June 2025 at the RAI Exhibition Centre, Amsterdam. Over two days, Allpack's stand B83 welcomed 20 professionals for in-depth discussions surrounding our new concept that was recently launch at the show 'Packaging Perfected, Global Sourcing and Seamless Supply'.

The new concept for our European clients brings together over 30 years of knowledge and expertise on tailor-made packaging products, combining our global sourcing abilities to connect clients with industry-leading suppliers, while eliminating the complexity of international supply chains and continuously providing a seamless supply of product, which is supported by powerful data reporting programmes.

Multimodal Exhibition, 17-19 June, NEC

## Multimodal Exhibition, 17-19 June, NEC

Allpack recently participated at the 2025 Multimodal Exhibition, stand #8040, which took place 17-19 June 2025, at the NEC Birmingham. After a 9-year hiatus, Allpack was back exhibiting at Multimodal, showcasing our range of hand, machine, and automated pallet wrap solutions to help businesses across logistics, warehousing, and supply chain operations to maximise load stability, reduce waste, and boost efficiency.

Alongside the pallet wrapping solutions, we also promoted our new load stability testing equipment that can be used on a consultative client visit to ensure our clients are maximising their pallet loads and uncover where there could be potential issues with carton side load strength and ascertain pallet wrapping requirements are maximised through the film being used and the number of pallet wrap rotations.

## Allpack To Showcase Innovative Packaging Solutions at the PPMA Show 2025

Allpack is pleased to announce it will be exhibiting at the PPMA Show 2025, stand E12, taking place from 23–25 September at the NEC Birmingham, Hall 5. The PPMA Show is the UK's largest processing and packaging machinery exhibition, bringing together industry leaders, manufacturers, and suppliers from across the packaging supply chain. At this year's event, Allpack will showcase its latest range of packaging solutions designed to help businesses improve operational efficiency, reduce packaging waste, and achieve their sustainability goals.

During the PPMA Show Allpack stand visitors will be able to discover advanced pallet wrapping systems including hand and fully automated options to boost pallet wrapping productivity, load stability and cut film usage.

There will be live demonstrations of the latest packaging machinery, including the S7 Robopac automated pallet wrapping robot, grip® void fill equipment to streamline packing operations and accelerate productivity.

## New & Updated PaintGuard™ Pulp Fitment Designs Expand the Range with New Rectangular Fitments

The PaintGuard™ Pulp Fitment range from Allpack is renowned for offering high-quality, eco-friendly solutions that protect paint cans during transit, ensuring product integrity from distributor to end user/customer. The new fitment designs build upon this reputation, delivering improved structural integrity, ease of use, and environmental sustainability.

The PaintGuard™ Pulp Fitment range have been upgraded, updated and expanded with the latest enhancements including the introduction of a new rectangular fitment product range to meet the evolving needs of paint and coatings manufacturers.

The new range of pulp fitments boasts enhanced protection, improving the structural design and strength of the boxed contents, which have been UK carrier-approved to guarantee the contents arrive in pristine condition.

The addition of new rectangular pulp fitments has expanded the original range of square fitments, allowing for increased versatility in different tin/tub configurations to benefit from using the PaintGuard™ system.

As with all PaintGuard™ products, sustainability is a key part of the product, with all component parts containing varying amounts of recycled content that align with Allpack's commitment to sustainability, such as the pulp fitment is manufactured from 100% recycled content and is fully recyclable and biodegradable, with the outer boxes being FSC® certified for extra peace of mind.

## New Launches

# Allpack Launches Two Comprehensive Packaging Guides to Enhance Efficiency & Sustainability

The Allpack Team have been working hard behind the scenes collating and creating content for two new packaging guides representing the Bags & Mailing and Labels categories. These comprehensive resources are designed to help businesses select the most efficient, cost-effective, and sustainable packaging solutions for all their mailing, bags and labelling requirements.

With a growing demand for environmentally responsible and high-performance packaging, Allpack has developed these guides to streamline the selection process, providing expert insights into a wide range of packaging options and address sustainability concerns with our Sustainability Certified range of products that can be found within the guides.

"We understand that businesses are looking for packaging solutions that are both practical and sustainable," said Andrew Almond, Marketing Manager at Allpack. "Both our new Bags & Mailing and Labels Packaging Guides are an invaluable resource that helps to simplify the decision-making process while ensuring customers find the best solutions to meet their needs."

The guides are available to view via the Allpack website, [www.allpack.uk.com/guides](http://www.allpack.uk.com/guides) where all of our other product category guides are located for ease of access.
