Allpack's Certification Update

Allpack Accomplishes AA+ BRCGS Grade

Following a recent unannounced audit, Allpack Packaging Ltd. was awarded an AA+ grade for Storage and Distribution from BRCGS. The sustainable packaging specialist has invested heavily in its operations in recent years, achieving an AA BRCGS rating in November 2023. Its recent AA+ accreditation is now its ultimate grade to date.

Designed for logistics operators dealing with food, packaging, and consumer products, BRCGS' Storage and Distribution Standard aims to reflect best practices and facilitate a process of well-designed risk-based product safety management systems. It also ensures that food products' quality and safety remain optimal during storage and distribution processes. While AA is the highest grade to be achieved from a BRCGS audit, companies that participate in an unannounced visit will receive a + after their grade as they elect to be challenged at the highest level – confident in the quality of their day-to-day operation and food safety procedures.

The BRCGS, which was rebranded from the British Retail Consortium in 2019, sets international standards for food safety and serves as evidence that organisations can adhere to regulatory mandates for the safe storage and distribution of food products. They prevent cross-contamination between food items and ensure the protection of the end consumer.

“This is an amazing achievement for Allpack Packaging Ltd to be presented with the AA+ grade following an unannounced audit in August”, explained George Clarke, Allpack’s Managing Director. He went on to add “The team have worked hard behind the scenes ensuring the documentation and procedures BRCGS expect to adhere to have been followed to the letter, displaying the staff’s passion and dedication that showcases Allpack Packaging Ltd is now in the elite strata of accreditation and certification for our packaging products and processes.”

Allpack Showcases Packaging Innovations at Industry Focused Exhibitions

New Product Launch

Allpack Showcases Packaging Innovations at Industry Focused Exhibitions

During recent months Allpack has captivated audiences with its innovative packaging solutions at two prominent exhibitions during 2024: IRX Expo 2024 and London Packaging Week 2024 Exhibition.

These events served as platforms for industry leaders to showcase cutting-edge technologies, trends, and solutions in their respective fields. Allpack's participation underscores its commitment to pushing the boundaries of packaging innovation and meeting the evolving needs of its customers, whichever industry they are in.

Allpack Showcases Latest Packaging Products at IRX Expo 2024, NEC, Birmingham

Allpack showcased its latest packaging innovations at the IRX Expo 2024, held at the NEC in Birmingham. This event is a major platform for companies to display cutting-edge solutions in the world of eCommerce and packaging. Allpack's participation highlighted sustainable and innovative packaging solutions, reflecting the growing emphasis on eco-friendly practices within the retail industry and the ecommerce sector. Wrist-Ease was just one of the packaging brands Allpack displayed during the two-day event. The team held some great conversations and discussions on how our innovative packaging products could benefit fulfilment processes.

"The IRX Expo provided a positive opportunity to discuss real-time projects and explore how our range of packaging solutions would enhance existing workflows and packaging processes" explained Andrew Almond, Allpack's Marketing Manager. He went on to add "We look forward to being present at the 2025 IRX Expo, 13-14 May, NEC, Birmingham for further in-depth discussions with experts and leaders in digital commerce, that will offer insights into the new technologies that are shaping the future of online retail and packaging sectors."

Allpack Displays Packaging Innovations at London Packaging Week 2024, ExCeL, London

Allpack recently participated in London Packaging Week 2024, held on September 11-12 at the ExCeL Centre in London. This event brought together over 190 exhibitors and thousands of visitors from across the packaging industry, showcasing the latest innovations in sustainable packaging. Companies like Allpack, alongside other major players, highlighted their efforts to drive forward eco-friendly packaging solutions.

One of the key themes of this year's event was the increasing focus on sustainability and compliance with evolving regulations. Exhibitors discussed cutting-edge developments, such as paper-based and bio-based packaging, driven by industry trends and consumer demand for greener products. This was especially relevant given ongoing discussions around extended producer responsibility (EPR) and other regulatory frameworks that impact the packaging industry.

The event was hailed as a success, with strong engagement from brands, suppliers, and industry leaders, and featured numerous presentations and panel discussions on future packaging trends.

“London Packaging Week (LPW) provided a plethora of established brands from across diverse industries that were interested in discussing the latest packaging innovations, with a view of how they could be implemented within their operations or supply chains” explained Andrew Almond, Allpack’s Marketing Manager. He added “We were proud to sponsor the Networking Bar and the events lanyards, with our exclusive 30th Anniversary lanyard design, confirming our commitment to the packaging sector”.

Allpack looks forward to exhibiting at the 2025 London Packaging Week event, being held 15-16 October 2025, ExCel, London.

New Product Update

sigma¹⁵⁰wrap™

Sigmawrap™ Perforated Cast Machine Film is the best option to use for wrapping goods that **need to dissipate heat** after their production process.

Pharmaceutical processes and drink manufacturing operations are just some of the sectors to benefit from this innovative product. The perforated pallet wrap permits air to flow in and through the wrapped goods, allowing them to breathe and vastly reduces condensation, compared to using unperforated pallet wrap.

Sigmawrap Perforated Cast Machine Film is manufactured with 30% recycled materials, making it Plastic Packaging Tax Compliant.

Luke celebrated his 10 Year Anniversary at Allpack

Over the previous quarter, Allpack recognised the achievements of the following staff members.

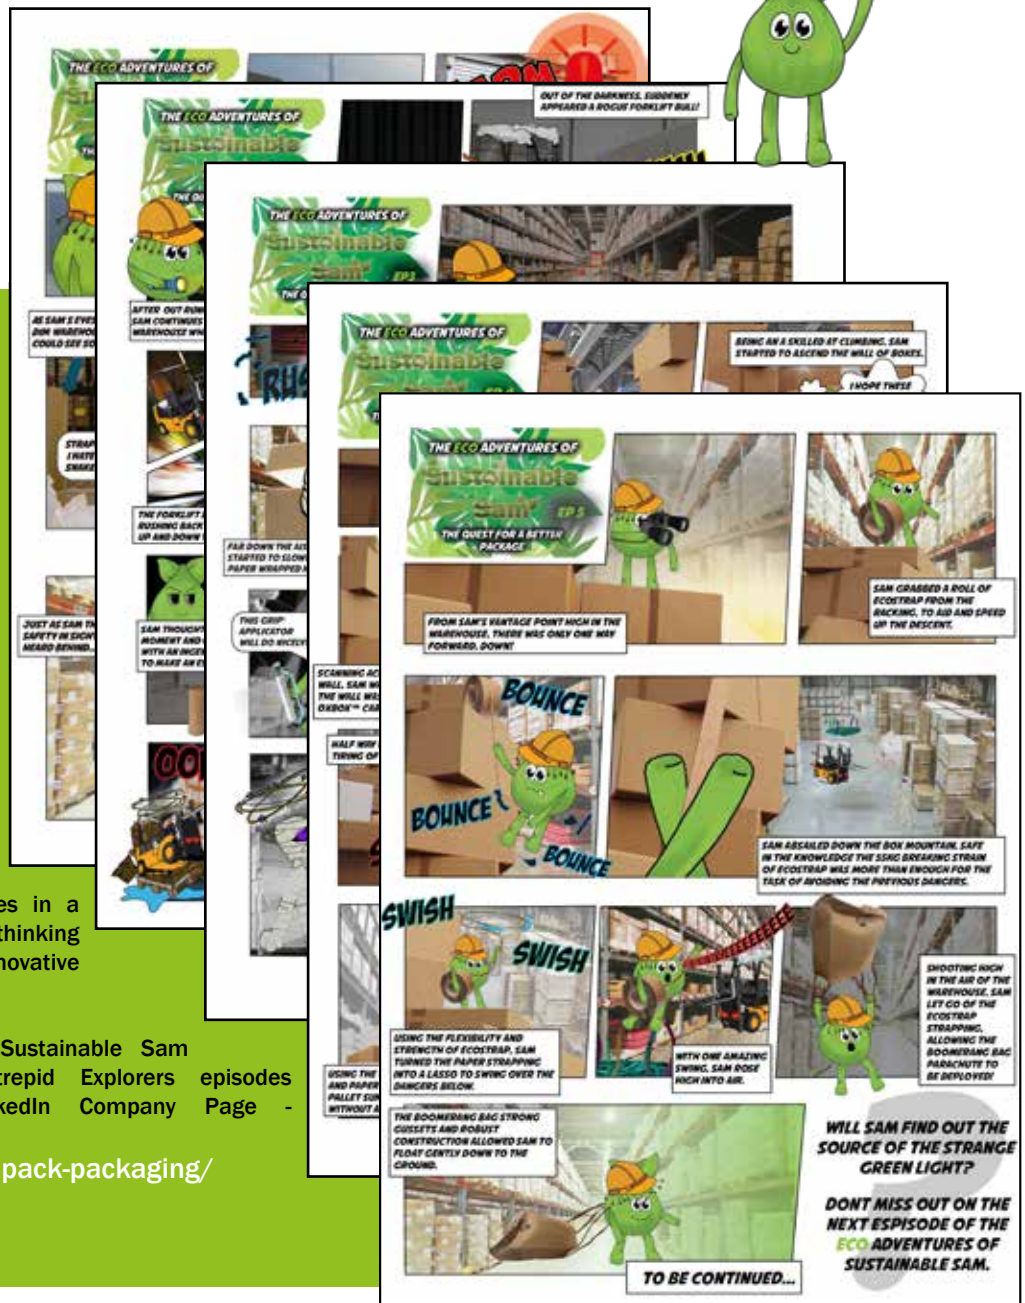

Allpack introduced a new comic strip series called The Eco Adventures of Sustainable Sam - The Quest for a Better Package to coincide with the Forest Stewardship Council (FSC) Week during September, as a light-hearted means to encourage the broader commitment to sustainability and responsible packaging practices. Allpack's participation in the 2024 FSC Week reflects its dedication to sustainable business practices.

The 5 episodes of 'The Eco Adventures of Sustainable Sam and The Quest for a Better Package' comic strips have been designed to engage audiences with Allpack's Eco-Champion in emphasising Allpack's range of sustainable packaging solutions against an array of fictional enemies in a warehouse setting, where the quick-thinking Sam uses packaging products in innovative ways to overcome adversity.

If you've missed out on any of Sustainable Sam episodes, worry not, all our intrepid Explorers episodes are available via Allpack's LinkedIn Company Page -
